

# Janmajay Singh

---

## CONTACT INFORMATION

*E-mail:* [janmajay.singh@rice.edu](mailto:janmajay.singh@rice.edu)  
*Website:* [janmajaysingh.github.io](http://janmajaysingh.github.io)  
*Phone:* (+1) 713-894-0521

## RESEARCH INTERESTS

My research focuses on developing novel computational and statistical methods for problems in biology and medicine. I have mostly worked at the intersection of predictive, causal and mixture models and conducted research in multiple biomedical modalities (Omics, EMR and ECG). In addition, I have also worked in the recommendation and NLP domains. My projects have featured in **JMIR Medical Informatics**, **UAI** and **RecSys**.

## EDUCATION

**Rice University**, Houston, Texas, USA

Ph.D., Computer Science (August 2022 - May 2027 [expected])

- Advisor: Dr. Vicky Yao

**Massachusetts Institute of Technology**, Cambridge, Massachusetts, USA

Special Student, Electrical Engineering and Computer Science (September 2015 - May 2016)

- Advisor: Dr. P. H. Winston

**SRM University**, Chennai, Tamil Nadu, India

Bachelors in Technology, Computer Science and Engineering (July 2013 - June 2017)

- CGPA: 9.33/10

## RELEVANT WORK EXPERIENCE

**Fujifilm Corp. - R&D HQ**, Kaisei, Kanagawa, Japan

*Research Scientist II - Computational Biology*

**November, 2020 - Present**

Part of the Liquid Biopsy team at the Imaging Technology Center. Primary responsibilities include predictive model design and development for cancer prediction from blood DNA samples. Secondary responsibilities include algorithm design to reduce noise from DNA sequencing process. Proposed noise reduction algorithm successfully reduced measurement noise by 57% compared to targeted 10%, substantially improving the project workflow.

**Fuji Xerox Co., Ltd. - R&D HQ**, Yokohama, Kanagawa, Japan

*Research Scientist - Predictive Models*

**September, 2018 - October 2020**

Worked on modeling missing patterns in observation health record data from the ICU, and designed algorithms which enabled early diagnosis of diseases. Also developed methods for long-term predictions in sequential recommender models and interpretability.

*Research Fellow - Affective Computing*

**September, 2017 - July, 2018**

Focused on sentiment analysis models and their interpretability using NLP and reinforcement learning respectively. Also learned about orchestration frameworks for IoT devices.

**Voonik Technologies Pvt. Ltd. - R&D**, Bangalore, Karnataka, India

*Research Intern*

**December, 2016 - June 2017**

Worked on building a real-time recommendation system from scratch, primarily focusing on latency minimization and state-of-the-art algorithm reproduction. Successfully completed a system compatible with limited hardware, employing a graph-based algorithm and a Neo4j database. The project was successfully deployed for a user-base of 10,000 users.

ACADEMIC  
PROJECTS

**Massachusetts Institute of Technology - CSAIL**

*Student Project*

**March, 2016 - June 2016**

Researched under Prof. P.H. Winston on adapting a doctor-patient conversation for use in an AGI system called "Genesis". The system's feasibility in a clinical decision support setting for real-time diagnosis was explored. The lack of medical lexicon in the system was identified as a limitation and fixed which showed improved inductive abilities.

**SRM University - Dept. of Computer Science**

*Project Mecura*

**May, 2014 - May 2015**

Initiated a project for developing a Electronic Medical Record System for the university hospital. Coordinated a team of 15 members to successfully design a website and back-end system for EHR easy access. Learned about privacy challenges in healthcare and leadership skills.

- AWARDS **Fujifilm Technical Report Award:** 2021 recipient, usually given to 5 of ~300 members of the R&D group.
- Fuji Xerox Outstanding Research Award:** Twice (2020 and 2021) recipient, usually given to 10 of ~300 members of the R&D group.
- Physionet Challenge 2019** Finished 5<sup>th</sup> of 104 teams internationally by building a highly accurate model for early diagnosis of sepsis in a population of ICU patients.
- OTHER EDUCATION **MITx - Statistics and Data Science MicroMasters**, edx.org
- An online Masters program hosted by MIT. The courses fulfill the MIT IDSS PhD credit requirements.
- 14.310Fx: Data Analysis in Social Science
  - 6.86x: Machine Learning with Python
  - 6.431x: Probability
  - 18.6501x: Fundamentals of Statistics
- COMPUTER SKILLS
- Languages: Python, R, Java, C++, bash scripting.
  - Deep Learning Frameworks: PyTorch, Tensorflow, Keras
  - Databases and Tools: MySQL, PostgreSQL, MongoDB, Neo4j, Kafka
